Jobs

- Wir streben eine Unternehmenskultur an, die von Fairness, Respekt und Teamgeist geprägt ist.
- Wir fördern unsere Mitarbeitenden bei Aus- und Weiterbildungen. Sie werden durch uns auf die zukünftigen Herausforderungen vorbereitet und dahingehend gefördert.
- Wir schaffen laufend Lehrstellen und Ausbildungsplätze und fördern somit unseren eigenen fachkundigen Nachwuchs.
- Wir honorieren individuelle Leistungen wie auch langjährige Mitarbeit durch kontinuierlich steigende Treueprämien. Wie kein anderes Detailhandelsunternehmen ist unser gesamtes Verkaufspersonal am Erfolg beteiligt.

Guten Tag

Damit unsere Personalabteilung Ihre Bewerbung zügig bearbeiten kann, bitten wir Sie eine Reihe von Fragen zu beantworten.

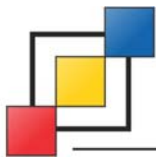

Die Fragen sollen helfen herauszufinden, ob eine Bewerbung als Chauffeur bei OTTO'S für Sie sinnvoll ist, oder ob möglicherweise eine andere Stelle Ihrem Fähigkeitsprofil noch besser entsprechen würde. Ihre neue Arbeit soll letztlich zu Ihren Interessen und Kompetenzen passen.

Die Beantwortung der Fragen wird ca. 15 Minuten beanspruchen.

Weiter

Os candidatos devem fornecer detalhes a respeito de declarações que esclareçam os requisitos básicos.

	K.o.-Items	

Ich besitze seit mehr als 3 Jahren einen Führerschein "C" für Lastwagen und "E" für Anhänger.

Diese Aussage:	
1 ○ trifft voll zu. (++)	4 ○ trifft gar nicht zu. (--)

		
	K.o.-Items	

Ich bin fähig Lastwagen mit Anhänger gekonnt zu manövrieren.

		
	K.o.-Items	

Beim Manövrieren steige ich lieber einmal zu viel als einmal zu wenig aus, um die Situation zu beurteilen und Kratzer und Schäden zu vermeiden.

		
	K.o.-Items	

Bei erschwerten Bedingungen (Regen, Dunkelheit, Nebel, Glätte, Schnee, etc.) macht mir das Fahren Mühe und ich fahre äusserst ungern.

		
	K.o.-Items	

Ab und zu ein Gläschen oder ein Bierchen - auch tagsüber - macht mir überhaupt nichts aus und beeinträchtigt meine Konzentration und Fahrweise überhaupt nicht.

O questionário para esclarecer os pré-requisitos básicos tem entre 20 e 40 itens.
Editar, adicionar e excluir é possível a qualquer momento.

Comparação com o procedimento anterior e o processo otimizado com PEP.

Applicants read the job offers as before. Those who click on “Online application” . . .	
. . . enters name, first name, etc. and submits the application documents. If these are incomplete, the applicant is contacted. The documents are evaluated and placed in order of suitability (rejection/wait/invitation)	. . . enters name, first name, telephone and email and answers questions to clarify the basic prerequisites. Those who do not meet these automatically receive a rejection. Those who meet answer a test regarding potential that is fitting for the position.
HR views 100% of application documents. General information, evaluation difficult. Quality moderate. Time spent on each vacancy considerably.	HR views ~10% of application documents. Specific information, evaluation simple. Quality good. Create questionnaire: one time 3-4 hrs
Those who have supplied application documents that are complete, in order and which show that they can be considered for the position are invited for interview.	The applicants with the highest potential are displayed at the top of the list. After checking reality distance, k.o.-Items and answers and profile values, 3 applicants are called and one is invited to interview.
Inviting a number of applicants	Inviting few applicants
As many interviews are carried out as are required until a fairly suitable applicant is found and employed (10 to 30 interviews depending on position).	1 applicant is interviewed and appointed 1 to 3 interviews are carried out for each position to be filled. Hardly ever more.
Many interviews with non fitting persons	Few interviews with fitting persons
The selection process is dragging on. Communication is unavoidable and manifold. Queries of “what is the situation with my application?” require a response/administration.	The process is rapid. Communication is rare or non-existent. Administration is easy to manage. Invitations and rejections are sent with a few clicks of the mouse. All time overview.
Duration: Long	Duration: Short

Encontre com mais rapidez e selecione mais adequadamente.

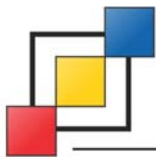

Mais fácil, mais rápido, mais barato e muito melhor!

Suitable applicants are lost or not invited for interview at all due to administrative criteria For the purpose of reducing expenditure, the first fairly suitable person is employed in order to end the process.	PEP shows who meets the basic prerequisites and has a high level of potential The best are directly compared with one another which simplify the selection of the most fitting to the company/team.
Quality of the applicant: Average	Quality: Good and very good
The quality of the clarification reduces with the increasing number of applicants. Assessment criteria vary, as does the sequence of events (different at the start to the end)	Few, yet good interviews (with interview guides for clarifying the topics of interest). Previously set criteria related to demands and tasks.
Variable, subjective, unequal	More structured, objective, equal for all
Working hours: 100%	Approx. 85% fewer
Costs: 100%	Approx. 50 to 80% lower
In the new procedure, the decision as to who is employed is made by people, as was the case before; by the superiors and HR. Only the preparation of the decision is optimized.	

Important questions for Recruiting Specialists concerning the pre-selection:

Pre-selection		
Continue to do the tedious, time-consuming pre-selection yourself	OR	let it be done by "electronic interview" quickly and reliably?
Reading too many CV and interviewing many unsuitable candidates	OR	only those who meet the basic requirements and have high potential?
Loosing good candidates due to slow pre-selection process to other companies	OR	identify the best quickly and win them for the own company?
Selection		
Continue to take unnecessary risks	OR	take decisions based on a more solid information base?
Continue conducting many interviews with less good candidates	OR	with high probability, only professionally really skilled ones?
Doing it slowly and more complicated and expensive than necessary	OR	make it faster, as easy as possible and save a lot of money?
Go on as ever (and like others do it, too)	OR	or, try the with PEP optimized process as soon as possible?
